

Como verificar as Tabelas Existentes no Banco de Dados

Para visualizar as tabelas do Banco de Dados devemos utilizar o comando **USE** seguido do Banco, e o comando **SHOW TABLES**.

The screenshot shows a SQL client interface with a command editor at the top and a result grid at the bottom. The command editor contains the following SQL commands:

```
1 USE sakila;  
2  
3 • SHOW TABLES;
```

The result grid displays the output of the **SHOW TABLES** command, listing the tables in the **sakila** database. The tables are listed in a single column, and the first row is highlighted with a red box.
