

## Como verificar os Bancos existentes no Workbench

Para visualizar os Bancos existentes no MySQL devemos utilizar o comando **SHOW DATABASES**

The screenshot shows the MySQL Workbench interface. The top menu bar includes File, Edit, View, Query, Database, Server, Tools, Scripting, and Help. Below the menu is a toolbar with various icons. The main editor area shows a single line of SQL code: `SHOW DATABASES;`. Below the editor is a toolbar with icons for saving, running, and other actions, along with a 'Limit to 1000 rows' dropdown. At the bottom, the 'Result Grid' is displayed, showing a table with one column labeled 'Database' and eight rows of database names: dbfuncionarios, information\_schema, mysql, performance\_schema, sakila, sys, and world. The entire result grid is highlighted with a red rectangular border.

Database
dbfuncionarios
information_schema
mysql
performance_schema
sakila
sys
world
